Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

Structure No. 21048X0 is a 12-foot concrete slab that crosses Downey Branch in Washington County. The structure consists of two six-foot spans with standard abutments without horizontal scoring. The original parapet has been replaced with a modern guardrail. The actual date of construction is not known, however, the design of this structure is similar to the 1912 State Roads Commissions Standard design.

The historic context report, Small Structures in Maryland's Roadways, indicates that concrete slabs built between 1912-1933 were the most widely used small structure. Unaltered concrete slab structures built according to the standard plans could be eligible for the National Register under Criteria C if all character-defining elements are present. Although the structure retains three of the original abutments, one abutment has been replaced and one has severely deteriorated and needs repair. A metal guardrail has also replaced the original parapet. These alterations have compromised the integrity of the structure. Therefore, Structure No. 21048X0 is not eligible for listing on the National Register of Historic Places.
